Abstract and Narrative

Project Abstract (The Problem): Briefly describe project's purpose, identify target population, and discuss program components which address the identified problem. Include local statistics to substantiate the need.

The purpose of the Guilford County Sheriff's Office's 2016 Local Law Enforcement Block Grant application is to purchase much needed technology for the Sheriff's Office. With aging computers, the Sheriff's Office seeks to replace these items with tablets to offer greater portability for the officers in the field. With constant, "hold the line" local budgets, this grant proposal will enable the purchase of more current technology for the officers.

Project Narrative (Operation): Include a description of how grant funded positions are integral to the project and how contractual, travel, operating, and equipment expenses will support the project. Discuss how you will collaborate with other agencies. Focus on the project – do not give agency history, do not repeat abstract.

Like many law enforcement agencies, Guilford County is in need of technology upgrades to enable better community response by law enforcement. The operational portion of this grant is to purchase technology (tablets) to promote better portability for the officers in the field. This technology purchase will fall within all parameters of the Justice Assistance grant and the Governor's Crime Commission's requirements. Having a portable device such as a tablet enables officers to address issues, answer questions, from citizens or inquire referral information, etc. Operationally, the use of tablets increases the portability of information and enhances the professionalism of officers as they are in the community.

Project Narrative Summary: Please provide additional information about your project application.

This application seeks to purchase technology (tablets) to replace aging computers within the Guilford County Sheriff's Office. Purchasing a portable device will enable officers the ability to look up information, provide information to citizens etc. This purchase is currently prohibitive under the current budget. This grant enables the Guilford County Sheriff's Office to upgrade aging technology to assist in officer productivity.
