

County Quarterly Report

The information provided is the quarterly financials for Trillium Health Resources.

Below is a brief explanation of the funding sources received by Trillium Health Resources:

Medicaid:

Trillium is paid on a per member per month (PMPM) basis by the Division of Health Benefits (DHB) for our Medicaid at risk contract. We receive a monthly payment at the beginning of each month to pay for services for our members as well as receive administrative funds to operationalize the plan.

State:

State funds are paid on a 1/12 basis. Funds are paid to providers via two primary methods. The majority of our funds are paid as services provided to consumers, which are billed through Trillium Business System (TBS), just like the Medicaid funds are expended, and others are paid on an invoice (expenditure) basis.

County:

Trillium is funded by our counties per NCGS 122C-115. County funding covers services (see specific list below) that our State and Medicaid funding does not. Trillium directly provides or contracts to provide these resources in each county.

- * Crisis Intervention Training (CIT) for law enforcement and others in your county
- * Adult and Child Mental Health First Aide Training
- * Assistance with maintaining housing when related to treatment
- * Availability of beds for both females and males at Healing Transitions in Wake County
- * Addressing many Social Determinants of Health in the County
