ARTICLE I. - IN GENERAL

Sec. 5-1. - Definitions.

In the construction of this article, the following definitions shall be observed:

Adequate exercise or exercise: The opportunity for the animal to move sufficiently to maintain normal muscle tone and mass for the age, species, size, and condition of the animal.

Adequate shelter: Provision of and access to shelter that is suitable for the species, age, condition, size and type of each animal; provides adequate space for each animal; is safe and protects each animal from injury, rain, sleet, snow, hail, direct sunlight, and the adverse effects of heat or cold, physical suffering, and impairment of health; is properly cleaned; enables each animal to be clean and dry, except when detrimental to the species; and for dogs and cats, provides a solid surface, resting platform, pad, floormat or similar devices that is large enough for the animal to lie on in a normal manner and can be maintained in a sanitary manner. Under this chapter, shelter whose wire grid, or slat floors which (i) permit the animals' feet to pass through the openings, (ii) sag under the animal's weight, or (iii) otherwise do not protect the animals' feet or toes from injury are not adequate shelter.

Adequate space: Sufficient space to allow each animal to (i) easily stand, sit, lie, turn about, and make all other normal body movements in a comfortable, normal position for the animal and (ii) interact safely with other animals in the enclosure. Birds must be provided with adequate perches appropriate to the species which allow the bird to stand completely upright without having any head contact with the ceiling of the cage and any tail contact with the floor or grate of the cage. Cages must be sufficient size to allow the bird to fully extend its wings. When freedom of movement would endanger the animal, temporarily and appropriately restricting movement of the animal according to professionally accepted standards for the species is considered provision of adequate space.

Ambient temperature: The temperature surrounding the animal.

Animal: Every living creature, domestic or nondomestic, but does not include humans and does not include invertebrates.

Animal control: The animal control component of the agency which includes the animal control function for the jurisdiction, however denominated.

Animal control officers: Any animal control officer employed by the jurisdiction.

Animal cruelty investigators: All persons appointed by the board of county commissioners as county animal cruelty investigators under G.S. chapter 19A.

Animal shelter: The animal shelter operated and maintained by Guilford County for the purpose of impounding animals under the authority of this chapter or the General Statutes of North Carolina for the care, confinement, return to owner, adoption, or humane euthanasia.

Cat: A domestic feline of either sex.

Such behavior includes, but is not limited to, the animal's biting or attacking or attempting to bite or attack any person or other domestic animal. The following criteria will be used in identifying an animal that is attacking or attempting to attack:

- (1) Any animal which, when unprovoked, chases or approaches a person upon the streets, sidewalks, or any public or private property in a menacing fashion or apparent attitude of attack.

- (3) Any animal owned or harbored primarily or in part for the purpose of fighting or any animal trained for fighting.
- (4) An animal shall not be deemed dangerous solely because it bites, attacks, or menaces:

Such animals are further defined as being those mammals or non-venomous reptiles weighing over 20 pounds at maturity, which are known at law as free nature. Harsh weather conditions: Conditions of extreme temperature and/or perception, and including exposure to sunlight, which may cause a risk of harm to an animal subjected to prolonged exposure without receiving shelter.

High-volume dog breeder: Any breeder who, during any calendar year maintains more than seven or more intact female dogs. A veterinarian who provides whelping services within a veterinarian-client-patient relationship, and has no ownership interest in the bitch, is not included in this definition.

The owner is responsible for the care, actions and behavior of his animals.

Properly cleaned: Carcasses, debris, food waste, excrement and standing water or liquid wastes are removed from the shelter or enclosure with sufficient frequency to minimize the animal's contact with the above-mentioned contaminants and keep the shelter or enclosure in a sanitary condition reasonably free of disease-causing agents and odors offensive to the public; and the shelter or enclosure is cleaned so as to prevent the animals confined therein from being directly or indirectly sprayed with any stream of water, or directly or indirectly exposed to hazardous chemicals or disinfectants.

- (2) Cooperating with the health director and assisting in the enforcement of all laws of North Carolina with regard to animals and especially with regard to vaccination of dogs against rabies and the confinement or leashing of vicious animals.
- (3) Making canvasses of the county, including homes and any businesses in the county, as necessary for the purpose of ascertaining compliance with this chapter or state statute.
- (4) Investigating all reported animal bites or other human physical contact with the suspected rabid animal, enforcing quarantine ordered of any animal involved, and submitting bite reports and reports of human contacts to the health director.

- (10) Being empowered to issue notices of violations or citations of this chapter in such form as the animal control supervisor may prescribe.

(Ord. of 11-21-13)

Sec. 5-4 - Regulation of high volume breeders and retailers.

- (1) No person may act as a high volume breeders or retailer except in accordance with a permit issued pursuant to this section.
- (2) Animal control shall issue the permit required by this section. Before issuing the permit, animal control shall require proof that each of the conditions set out herein have been met by the breeder.
- (3) The application for a permit shall include the name, address, and telephone number of the owner of the animals, the address and physical location of the kennel. It shall also include the number, breed, type and age of the animals.
- (4) Housing.
 - a. Housing—Shall provide for sanitary and safe housing for dogs, and shall provide adequate space appropriate to the age, size, weight, and breed of the dog and that allows the dog to engage in normal body movements, including the ability to sit, stand up, turn about freely, or lie fully recumbent in a natural position. The primary enclosure shall provide at least partial solid flooring. Nonsolid flooring must be safe for the breed, size, and age of the dog; be free from protruding

sharp edges; and be designed to that the paw of the dog is unable to extend through or become caught in the flooring.

- b. Each dog, if housed in a primary enclosure, whether housed alone or with other compatible dogs, shall be provided a minimum amount of space, calculated as:
 - i. For nonbreeding dogs housed together, the primary enclosure shall provide 100 percent of the required space for each dog, if maintained separately.
 - ii. Each bitch with nursing puppies must be provided with an additional amount of floor space, based on her breed and behavioral characteristics, and in accord with generally accepted husbandry practices as determined by the attending veterinarian. If the additional amount of floor space for each nursing puppy is less than five percent of the minimum requirement for the bitch, such housing must be approved by the county.
 - iii. The interior height of a primary enclosure must be at least six inches higher than the head of the tallest dog in the enclosure when it is in a normal standing position.
 - iv. Innovative primary enclosures not precisely meeting the floor area requirements provided in paragraphs b(i), b(ii), and b(iii) of this section, but that provide the dogs with a sufficient volume of space and the behavioral needs stated in section 5-7 may be used at an operation when approved by the county.
- c. Shelter—Shall provide protection from harmful extremes of temperature, air movement, moisture, light and other climatic elements to ensure proper health and well-being of the dog.
- d. Storage facilities—Shall be designed and maintained as to provide adequate storage to protect food, medicines, supplies, and bedding from deterioration, contamination, and vermin infestation. Any potentially toxic substance should be stored in a manner to avoid contamination and potential for harm to the dogs.
- e. Structure—Shall be structurally sound, in good repair, have no sharp edges or points that could injure the dog(s), and shall securely contain the dogs while precluding access by other animals. Structural surfaces should be sanitizable or replaceable.
- f. Waste disposal—All excreta, feces, debris, and food wastes must be removed from enclosures, at least once daily, and from under primary enclosures as often as necessary, to prevent an excessive accumulation of feces and food waste, to prevent soiling of dogs contained in the enclosure, and to reduce disease hazards, insects, pests and odors. Premises must be kept free of accumulations of trash, junk, waste products, and discarded matter. Waste must be handled and disposed of in a manner that poses minimal hazards to dogs and personnel, and reduces the likelihood of contamination of the soil or ground water with chemicals and/or microorganisms.
- g. Cleaning and sanitation—Hard surfaces with which the dogs come in contact must be spot-cleaned daily and sanitized at least once every two weeks and more often if necessary to prevent accumulation of dirt, debris, food waste, excreta, and other disease hazards. When steam or water is used to clean the primary enclosure, whether by hosing, flushing or other methods, dogs must be removed, unless the enclosure is large enough to ensure the dogs will not be harmed, wetted, or distressed in the process. Standing water must be removed from the primary enclosure and dogs in other primary enclosures must be protected from being contaminated with water and other wastes during cleaning.
- h. Lighting—The facility shall have sufficient lighting by natural and/or artificial means as to allow observation of the physical condition of the dogs being housed, and to permit inspection and cleaning of the facility. A diurnal lighting cycle should be provided.
- i. Environment—Dogs shall be protected from extreme temperatures so as to maintain their health and render their environment comfortable. When climatic conditions pose a threat to a dog's health or wellbeing, taking into consideration such factors as the dog's age, breed, overall health

status and acclimation, appropriate measures must be taken to alleviate the impact of those conditions. Adequate ventilation shall be provided to minimize odors, drafts, ammonia levels, and to prevent the condensation of moisture.

- j. Pest control—An effective program for the control of insects, external parasites affecting dogs, and birds and mammals that are pests, must be established and maintained so as to promote the health and well-being of the dogs and reduce contamination by pests in dog areas.
- k. Retreat area—Dogs shall also be provided in their primary enclosure some form of a den, which shall comprise at least a solid floor and visual barrier, as to allow rest and retreat.
- l. Whelping box—All bitches with litters shall be provided an appropriate whelping box, which should provide means to contain the puppies during whelping, and provide some form of substrate, insulation or heat source so as to prevent dissipation of heat so that all puppies are able to maintain appropriate body temperature. If a heat source is provided, care must be taken to protect the bitch and puppies from thermal injury.

(5) Nutrition and hydration.

- a. Adequate food—A dog shall be fed at least once daily, or as otherwise required on the advice of a veterinarian. The food should be free from contaminants and be of sufficient nutritive value and quantity to maintain the normal condition and weight of the dog as germane to its age, sex, breed, and reproductive status.
- b. Potable water—Shall be provided at all times, unless otherwise directed by a veterinarian.
- c. Food and water receptacles—Shall be readily accessible to all dogs and shall be located to minimize contamination and to protect them from precipitation. Any non-disposable receptacles shall be durable, cleaned daily, and sanitized at least once per week; disposable receptacles shall be replaced daily, and automatic feeders shall be cleaned and sanitized regularly to prevent the growth of mold and deterioration or caking of feed. Automatic watering devices shall be kept clean, be properly and regularly sanitized, and be tested daily to ensure they are functioning correctly.

(6) Behavioral requirements.

- a. General.
 - i. The following behavioral needs shall be met at least daily, except as stated otherwise. All persons should have a documented protocol regarding how to meet the following necessary behavioral needs, and sufficient facilities and/or staff to meet them.
 - ii. The goal shall be to allow dogs the opportunity to partake in species-specific behaviors. Dogs shall not be housed for extended periods of time in a manner devoid of any enrichment and/or activity and/or social contact.
- b. Conspecific socialization—Dogs shall be provided with full-body physical contact with other compatible dogs daily, except as necessary for reasons such as veterinary treatment or quarantine, or prior to parturition for a bitch. Prior to weaning, a bitch and her litter shall fulfill all conspecific socialization needs among the group.
- c. Human socialization—Dogs shall be provided with daily positive human contact and socialization. Contact during feeding time alone is not sufficient to meet this requirement. Every effort should be made to provide dogs that are housed singly with visual enrichment, such as visual contact with conspecifics or humans, except as necessary for veterinary care, quarantine, or prior to parturition for a bitch.
- d. Locomotion.

- i. Persons shall ensure that each dog that is weaned has access to "locomotory activity"; this activity should allow for an animal to move sufficiently to develop and/or maintain normal muscle tone and mass as pertinent for the age, breed, sex and reproductive status of the dog. Provisions for locomotory activity should also allow the dog an opportunity to achieve a running stride.
- ii. The provided area for locomotion should be separate from the primary enclosure if the primary enclosure does not allow for fulfillment of adequate locomotion enrichment and social activities. The area must be kept clean, free of infestation by pests or vermin, and prevent escape of the dogs.
- iii. Forced activity, other than for veterinary treatment, is neither sufficient nor appropriate for fulfilling these needs. Physical activity that is repetitive, restrictive of other activities, solitary, and not goal oriented is neither sufficient nor appropriate for fulfilling all activity needs.

(7) Grouping.

- a. Dogs having locomotory activity in groups and/or social interaction must be compatible and free of infectious disease.
- b. Females in heat shall not be housed in the same primary enclosure with males, except for breeding purposes.
- c. Any dog exhibiting a vicious or aggressive behavior shall be housed separately, as needed to prevent injury to other dogs. As with quarantine, separation of dogs due to aggression should be accompanied by a program to resolve the underlying causes of this disorder.
- d. Isolation of any dog with an infectious disease or condition—If a dog is infected with a contagious disease or condition as determined by a licensed veterinarian, one must house the dog separately from healthy animals, and shall handle the dog in a manner that will minimize the likelihood of contagion. Handlers must wash their hands before and after handling each infected or contagious dog.

(8) Staff.

- a. An adequate number of trained staff must be provided to ensure appropriate upkeep of the facility and that all minimum care requirements for the dogs can be met.
- b. The permittee shall not hire individuals who have pled no contest or have been found to have violated any federal, state or local laws or regulations pertaining to animal cruelty within one year of application for employment, or more than one year if the board/agency determines the circumstances render the applicant unfit for employment.
- c. The permittee shall report to the board/agency any no contest pleas or convictions pertaining to animal cruelty involving any of his/her employees that occur during the time they are employed by licensee.

(9) Handling. Handling of all dogs should be done as carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm or unnecessary discomfort.

(10) Health and veterinary care. All persons shall:

- a. Ensure that necessary routine and preventive veterinary care is provided under the direction of a licensed veterinarian, and maintain a written health care management protocol addressing routine veterinary care. At a minimum, regular preventive care should include examination at least once yearly by a licensed veterinarian for breeding dogs.
- b. Assess each dog's health and welfare daily; this should include observation of body condition (e.g., appropriate weight, skin/coat/nail condition), behavior, and whether the dog is eating, drinking, urinating, and defecating normally.

- c. Provide prompt treatment of illness or injury under the direction of a licensed veterinarian.
 - d. Maintain records of any veterinary care, including records of regular preventive veterinary care.
 - e. Ensure that humane euthanasia is performed when necessary and only by a licensed veterinarian, or other certified personnel pursuant to state regulations, using methods cited in the American Veterinary Medical Association's Guidelines on Euthanasia and in accordance with applicable federal and state laws.
 - f. Upon written approval by a licensed veterinarian or the county, any dog may be exempted from any of the standards of care mentioned in section 5-5 reasonable expiration date must be provided for such exemptions at which time the exemption shall be re-evaluated to determine whether it is still appropriate.
 - g. All veterinary care provided pursuant to the requirements in this Act shall be provided within a veterinarian-client-patient relationship, and in accord with the state veterinary practice act, with provisions for both routine and emergency care.
- (11) a. Any person, household, or business entity permitted to conduct breeding operations shall allow Guilford County Animal Control to inspect, at reasonable times, without notification, at least one time per year, any premise used by the breeder for breeding animals. The purpose of the inspection shall be to insure the safety and health of the animals used in the breeding operation and compliance of the breeder with laws regulating the breeding and care of the animals in the care, custody, and control of the breeder. Animal control may revoke the permit of any breeder who refuses to allow an inspection of the breeder's premises used for breeding operations. Any breeder or retailer must demonstrate compliance with relevant, applicable local regulations.
- b. The requirements of this section apply to all breeders in operation on the effective date of this section, as well as any established thereafter.
 - c. A permit issued in accordance with this section may be revoked by Animal control for violation of any of the conditions enumerated under the subsection above. Animal control shall state the reason for revocation in writing and shall deliver the determination of revocation to the permittee personally or by registered or certified mail, return receipt requested.
 - d. Any person who is denied a permit or whose permit is revoked pursuant to this section shall have 30 days to comply with the requirements of this section or to reduce the number of animals not spayed or neutered on the premises to not more than four.
 - e. Any person who is denied a permit or who has a permit revoked may appeal the denial or revocation to the county manager or their designee by giving written notice of appeal to the county manager within 30 days after the receipt of the written determination. The county manager or their designee shall conduct a de novo hearing to determine if the permit should be denied or revoked. Any enforcement action shall stay pending upon determination of an appeal pursuant to this subsection.

(Ord. of 11-21-13)

Sec. 5-5. - Additional requirements for dog breeders and dog retailers who are maintaining facilities in violation of this chapter.

- (1) This section applies to:
- a. Any dog breeder or dog retailer who is not required to obtain a permit pursuant to section 5-4 of this chapter, and
 - b. Has been determined to operate a kennel or operate as a dog retailer in violation sections, 5-11, 5-12, 5-13., 5-14, 5-15, and 5-24 of this chapter.

- (2) Any person subject to the requirements of this section must meet the standards of section 5-4 for the breeding and/or dog retail operation for a period of two years after the notice of violation; such fees as set out in the fee schedule.
- (3) For the purposes of this section any person who has received a notice of violation for any of the above referenced sections will be deemed covered by the requirements of this section; if any/all citations or penalties issued are at some point overturned or deemed void, the person will have no further obligations under this section; however, the compliance review cost, plus any other costs incurred by the person, pursuant to the provision of this section during such time when compliance was necessary, may not be recovered.

(Ord. of 11-21-13)

Sec. 5-6. - Interference or concealment.

- (a) *Interference.* It shall be unlawful for any person to interfere with, hinder, molest, resist, or obstruct employees of animal control or its agents or veterinarians in the performance of any duty authorized by law or ordinance, or to seek to release any dog or cat in the custody of such agents (including from traps, cages, or other enclosures) except as specifically provided or authorized by animal control.
- (b) *Concealment of animal.* It shall be unlawful for any person to conceal, for the purpose of evading the licensing requirement or rabies vaccination requirement of the law or any applicable ordinance, any unlicensed or unvaccinated animal from any employee of animal control.

(Ord. of 11-21-13)

Sec. 5-7. - General duties of keepers/owners of animals.

It shall be unlawful for any keeper or owner of animals, to keep animals under unsanitary or inhumane conditions or to fail to provide proper food and water daily, adequate exercise, adequate shelter which is properly cleaned and properly lighted, adequate space, or to fail to provide proper medical attention for sick, diseased or injured animals, including treatment by a veterinary consultant if appropriate for the animal's health or condition, as well as adequate inoculation against disease, according to the species of the animal kept. If an animal control officer or law enforcement officer seizes an animal, and no attempt is made by the owner(s) to recover or appeal the seizure, the animal will be deemed abandoned after six working days and all owners' rights shall be forfeited to Guilford County.

(Ord. of 11-21-13)

Sec. 5-8. - Bird sanctuaries.

Previous designations of bird sanctuaries by cities or towns in Guilford County are unaffected by adoption of this chapter and remain in effect.

(Ord. of 11-21-13)

Sec. 5-9. - Animals running at large prohibited.

- (a) It shall be unlawful for any person owning or controlling any animal to allow the same to create a nuisance or public danger by running at large. It shall be the duty of animal control and/or law enforcement officers to take up and deliver any domesticated animal (e.g., dog, cat), including fowl and other domestic animals within the meaning of this ordinance found running at large to the county animal shelter. Each person owning or controlling an animal, including fowl, shall be responsible for taking whatever measures are reasonably necessary for keeping the animal on the owner's premises or under the owner's control when off his premises.

- (1) *Restraint of animals* (in incorporated areas or on less than one acre). It shall be unlawful for any person owning or having possession, charge, custody or control of any animal, excluding cats, to keep such animal on or off his premises unless such animal is under sufficient physical restraint such as a leash, bridle, cage or similar device which restrains and controls the animal (subject to the provisions set out in section 5-14 of this chapter), within a vehicle or adequately contained by a fence on the premises or other secure enclosure. If the owner possesses and maintains an effective and working invisible fence system to restrain his/her animals, a visible and permanent sign must be on the premises that states an invisible fence system is in use.
 - (2) *Restraint of animals* (on one acre or more in unincorporated areas). Notwithstanding the provisions of subsection (1) above, animals kept on a lot or parcel of real property in an unincorporated area one acre or greater in size do not have to be kept within a fence or other secure enclosure or under any physical restraint while on such premises. This exemption does not relieve any person of the duty to prevent his/her animal from constituting a nuisance under section 5-10 below.
- (b) This chapter shall not be interpreted as restricting persons owning specially trained hunting/working dogs, which can be controlled by voice commands, from actually using their dogs for hunting/working (in the presence of and under the voice control of the owner or an agent of the owner) in unincorporated areas of Guilford County where such activities are not prohibited by law.

(Ord. of 11-21-13)

Sec. 5-10. - Public nuisances prohibited.

- (a) The actions of an animal constitute a public nuisance when an animal disturbs the rights of, threatens the safety of, or damages a member of the general public, or interferes with the ordinary use and enjoyment of another's property.
- (b) It shall be unlawful for any person to own, keep, possess or maintain an animal in such a manner as to constitute a public nuisance. By way of example and not of limitation, the following acts or actions by an owner or possessor of an animal are hereby declared to be a public nuisance and are therefore unlawful:
 - (1) Having an animal that disturbs the rights of, threatens the safety of, or damages a member of the general public, or interferes with the ordinary use and enjoyment of one's property.

- (2) A warning sign of at least 120 square inches must be visible from each exposure of the structure which is visible to any adjoining property. Each sign must have a graphic representation of an appropriate animal such that the dangerousness or viciousness of the animal is communicated to those who cannot read, including young children.
- (3) The owner of the animal will be responsible for ensuring that the enclosure is maintained in such a condition as to meet the requirements of this chapter. Failure to maintain or repair the enclosure shall subject the owner to penalty under this chapter.
- (4) Prior to inspection of the enclosure by the appropriate personnel as described in (e) above the owner shall pay the current fee for the inspection of an accessory building. The animal shall not be returned to the owner's property until such time as this enclosure and warning signs have been

approved. While this structure is being erected, the animal must be boarded at the county animal shelter at the owner's expense. A deposit may be required by the owner equal to the estimated costs, including veterinary care for ten days boarding. Failure to pay said deposit when required shall be deemed a waiver of all rights regarding the animal.

- (f) *Confinement, muzzling and control of vicious animals.* It shall be unlawful for any owner or person to keep any vicious animal within the county unless it is confined within a secure building or enclosure or unless it is securely muzzled and under restraint by a competent adult who, by means of a leash, chain or rope, has such animal firmly under physical restraint at all times.
