BACKGROUND

Guilford County uses Lawson as their Enterprise Resource Planning (ERP) software tool. We have been a Lawson customer since 2006. In 2012, Lawson was acquired by Infor.

Infor software is used to perform critical functions such as County Human Resources, payroll processing, financial accounting, vendor sourcing, purchasing and contract management. They offer Software as a Service (SaaS) as a subscription model which has provided Guilford County with the following benefits:

- Software upgrades
- Hardware upgrades
- Disaster Recovery
- Cost containment by including annual maintenance
- High Availability

By renewing our current agreement with Infor, we will be able to continue using the software to perform the critical functions as mentioned above.
