TITLE

APPROVE INTERLOCAL WITH CITY OF GREENSBORO AND CITY OF THOMASVILLE FOR SHARED USE OF THE 800 MHZ CORE INFRASTRUCTURE

SPONSOR

Jim Albright

BACKGROUND

In early 2010, the City and County began the process of moving the public safety 800 MHz trunked radio system to the P25 platform. This migration required 7 years of capital investment by both parties on a 50/50 basis. Phase 1 was to replace the "core" of the radio system or the controller. This controller has capacity to link versus radio system in the triad together without the other municipalities re-investing in the technology. A fee model was developed between City and County to offset our initial investment, while offering value to the adjacent systems.

Attachment B - Fee Schedule (Regional User)

Administrative Fee (One Time)	\$ 5,500
	Monthly Annual
Regional Access Fee per unit	\$15.00 \$180.00
Miscellaneous Labor (per hour)	\$55.00
Consoles Access	\$45.00 \$540.00

BUDGET IMPACT

Increase in Federal/State revenues in the FY 2018-19 Recommended Budget for Emergency Services by \$30,000 based on County share of agreement with the City of Thomasville; this is included in the list of changes to the FY 2018-19 Recommended Budget.

REQUESTED ACTION

Approve interlocal agreement with the City of Greensboro and the City of Thomasville for shared use of the 800 MHz radio core infrastructure, in substantial form, effective July 1, 2018. The City of Thomasville will pay the Greensboro/Guilford County system for regional access and the funds will equally divided by the City/County.
